

Minitab Solution Center

September 2026 Release

1. New Feature in Minitab Solution Center	1
2. Problems Resolved in Minitab® Statistical Software	1
3. New Feature in Minitab Workspace	1
4. New Features in Minitab Dashboards	1

1. New Feature in Minitab Solution Center

Solution Space

Organize your analyses, data, dashboards, and other Minitab Solution Center work in one shared space. With Solution Space, you and your team can organize Minitab Solution Center assets, visualize connections between work items, collaborate, and preserve project context.

2. Problems Resolved in Minitab® Statistical Software

- Interactive control charts do not support multiple stamp columns. (375890)
- Y reference lines are not applied as expected when issued concurrently with multiple control charts. (385916)

3. New Feature in Minitab Workspace

Map AI

Generate editable process maps from images or text descriptions with Map AI. Convert handwritten sketches, whiteboard drawings, and other visual inputs into process maps automatically.

4. New Features in Minitab Dashboards

Improved Workflow

The getting started experience in Minitab Dashboards has been enhanced to help you quickly find relevant assets and get started faster.

Categorical Slicer Searching

Find slicer values faster with searchable categorical slicers. Enter part of a category name to quickly filter long lists and locate the value you need.

Connected Simulation Data

Use data connections as live inputs for Minitab Simul8® simulations in dashboards. Automatically detect supported data connections from uploaded simulation models, map dashboard data sources to simulation inputs, and refresh data before rerunning simulations to evaluate changing conditions.
